Military, space event meets May 7-10 in Los Angeles

LOS ANGELES—The 22nd Components for Military and Space Electronics (CMSE) conference and exhibition meets at the 4 Points Sheraton Hotel, Los Angels from May 7-10.

The 2018 offers an insight into current issues (design tradeoffs on cost, reliability and performance) and future challenges of military and space electronic components.

Two important keynotes

Two keynotes by internationally known speakers are on the schedule.

"The "Role of Standardization in 21st Century Mil-Aero Electronics," will be given by Anduin Touw of Boeing Space and INtelligence Systems.

Tom Green, TJ Green Associates, discussed critical issues in military and space electronics at last year's conference.

Dr. Rao Tummala, director of the Georgia Tech Microsystems Packaging Center, will present an address on "Packaging and and Heterogeneous Integration During and Post-Moore's Law Era"

30+ technical presentations

Over 30 technical presentations, a Copper Wire Panel Discussion and six half-day seminars cover a wide range of topics on electronic components for military and space electronics including "Moisture in Microelectronics" and "Mission Assurance for Small Satellites."

Last years' attendance was higher than past years, and the exhibit hall was completely filled with 21 exhibitors, a 50 percent increase from previous years.

Dr. Rao Tummala

Four-day event

The 22nd CMSE is designed to be a wellattended four-day event. Attendees, conference organizers, invited speakers, authors of papers, and exhibitors all contribute to creating a "high technical level" event, facilitating a free exchange of ideas for learning and collaboration.

Tom Green, TJGREEN ASSOCIATES LLC, continues the legacy that Leon Hamiter, Components Technology Institute Inc. has facilitated for the last 21 plus years.

More information on the advance program, tutorials, attending or exhibiting is available at: https://www.tjgreenllc.com/cmse/2018-2/, or contact Tom Terlizzi at Terlizzi@tjgreenllc.com or 516-807-9488.

TAP TIMES is a media sponsor of the event.
