

# **Advance Circuit Technology, Inc. Announces**

**The appointment of GM Systems, as Long Island business development and Sales Representative**

Advance Circuit Technology, Inc., a Rochester, NY based manufacturer and assembler of PCBs and an EMS, is pleased to announce the signing of a new sales representative organization, GM Systems, covering key accounts in the Long Island Area.

Tom Terlizzi, Vice President and co-founder of GM Systems, said, "We are excited to work with this world-class contract manufacturer for Circuit Board Assemblies, Hybrid Circuits, Chip on Board (COB) Modules, MCM's and Box Builds. We are pleased to represent ACT which is a company with high quality and exceptional customer service bringing manufacturing back to the USA."

Kalman Zsamboky, VP of Sales and Marketing for Advance Circuit Technology, Inc. concurred: "We are continually looking for solid rep partners and have been taking steps to increase our national sales presence over these past several months. We are very pleased to have found GM Systems as a well-respected microelectronic consulting and electronic rep organization with many years in the hybrid, SMT, and Hi-reliability electronic system manufacturing business. We look forward to increasing our presence in the Long Island Area through Tom Terlizzi, and the GM Systems organization."

## **About GM Systems LLC**
